PROFESSIONAL SUMMARY

Highly motivated Data Science Engineer with strong expertise in Machine Learning, Data Analysis, Predictive Analytics, Statistical Modeling, and Data Visualization. Experienced in developing data-driven solutions using Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, and Power BI. Skilled in transforming large datasets into actionable insights, building predictive models, and deploying analytical solutions to support business decision-making.

TECHNICAL SKILLS

Programming Languages

- Python
- SQL
- R (Basic)

Data Science & Machine Learning

- Data Science
- Machine Learning
- Supervised Learning
- Unsupervised Learning
- Predictive Analytics
- Statistical Modeling
- Data Mining
- Feature Engineering
- Model Evaluation
- Hyperparameter Tuning
- Data Wrangling

Deep Learning

- TensorFlow

- Keras
- Neural Networks
- Deep Learning
- CNN
- ANN

Data Analysis Libraries

- Pandas
- NumPy
- Scikit-learn
- XGBoost

Data Visualization

- Matplotlib
- Seaborn
- Power BI
- Tableau

Databases

- SQL
- MySQL
- PostgreSQL

Statistics

- Probability
- Hypothesis Testing
- Statistical Analysis
- Regression Analysis
- A/B Testing

Big Data Technologies

- Apache Spark
- Hadoop

Deployment & Cloud

- Flask
- REST API Development

- Docker
- AWS
- Azure

Version Control

- Git
 - GitHub
-

EDUCATION

Bachelor of Technology (Computer Science Engineering)

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

Expected Graduation: 2027

CGPA: 8.8/10

PROJECTS

AI-Based Resume Screening and Candidate Ranking System

Technologies: Python, Machine Learning, Scikit-learn, Pandas, NumPy, Flask

- Developed an intelligent resume screening system using TF-IDF and Support Vector Machine.
 - Automated resume classification and candidate ranking.
 - Implemented cosine similarity for resume-job matching.
 - Generated recruitment reports and candidate shortlists.
 - Improved recruitment efficiency through predictive analytics.
-

Customer Churn Prediction System

Technologies: Python, Pandas, NumPy, Scikit-learn, XGBoost

- Built predictive models to identify potential customer churn.
 - Performed feature engineering and model optimization.
 - Improved prediction accuracy using ensemble learning methods.
 - Conducted exploratory data analysis on large datasets.
-

Sales Forecasting and Business Analytics Dashboard

Technologies: Power BI, SQL, Python

- Developed interactive dashboards to analyze business performance.
 - Built forecasting models for future sales prediction.
 - Presented actionable insights to improve decision-making.
-

Sentiment Analysis using NLP

Technologies: Python, NLP, Scikit-learn

- Built machine learning models for sentiment classification.
 - Applied text preprocessing and feature extraction techniques.
 - Evaluated model performance using precision, recall, and F1-score.
-

Image Classification using Deep Learning

Technologies: TensorFlow, Keras, CNN

- Developed deep learning models for image recognition.
 - Applied data preprocessing and augmentation techniques.
 - Achieved high validation accuracy on benchmark datasets.
-

INTERNSHIP EXPERIENCE

Data Science Intern

ABC Analytics Pvt. Ltd.

May 2025 – July 2025

Responsibilities

- Collected, cleaned, and processed large datasets.
- Built predictive analytics solutions using Machine Learning.
- Conducted statistical analysis and hypothesis testing.
- Created Power BI dashboards and business reports.
- Collaborated with software engineers and analysts.
- Optimized model performance and improved prediction accuracy.

Achievements

- Increased model accuracy by 15% through feature engineering.
- Automated reporting processes using Python and SQL.
- Delivered actionable business insights to stakeholders.

CERTIFICATIONS

- Machine Learning with Python
- Data Science Professional Certificate
- Deep Learning Fundamentals
- SQL for Data Analytics
- TensorFlow Developer Certification
- Power BI Data Analyst Certification
- Tableau Data Visualization Certification

ACHIEVEMENTS

- Developed multiple end-to-end Data Science and AI projects.
- Built predictive analytics solutions for real-world datasets.
- Participated in hackathons and technical competitions.
- Recognized for analytical problem-solving skills.

SOFT SKILLS

- Problem Solving
- Critical Thinking
- Communication Skills
- Team Collaboration
- Analytical Thinking
- Time Management
- Decision Making

KEYWORDS

Data Science, Machine Learning, Predictive Analytics, Statistical Modeling, Data Mining, Data Wrangling, Feature Engineering, Model Evaluation, Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, XGBoost, Power BI, Tableau, Matplotlib, Seaborn, MySQL, PostgreSQL, Spark, Hadoop, AWS, Azure, Docker, Git, GitHub, NLP, Computer Vision, Deep Learning.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
